Reasons for Allowance

1. The present claims are deemed allowable over Yoshikawa et al. and Ejiri et al. since neither reference discloses or renders obvious a magnetic recording medium comprising an in-plane magnetic recording film and a perpendicular film formed on said in-plane magnetic film wherein the tBr of the two films meet applicants' claimed limitation.

To better clarify the record, the Examiner notes that while Yoshikawa et al. disclose a structure comprising {substrate/in-plane magnetic layer/perpendicular magnetic layer} wherein the in-plane magnetic layer has a tBr of 20 – 100 $\mu\text{m}\cdot\text{G}$ and Ejiri et al. teach using different tBr values for adjacent magnetic layers possessing an orthogonal relations, neither Yoshikawa et al. nor Ejiri et al. teach or render obvious the claimed tBr relationship. Specifically, the Examiner notes that upon further consideration, and in view of applicants' arguments, Ejiri et al. requires the lower layer to possess a tBr outside Yoshikawa et al.'s disclosed range and Ejiri et al. further disclose both layers having tBr values that are approximately identical (*e.g. Ejiri et al., Paragraph 0079 and Examples 1 and 7*). As such, the Examiner deems that the prior art of record fails to teach or render obvious the claimed tBr relationship between the in-plane magnetic recording layer and the perpendicular magnetic layer formed thereon.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
